June 2026

DataWorks Challenge 2026

An overview of DataWorks Challenge 2026 (third edition)

Technology and Engineering

DataWorks Challenge and why it matters

The ExxonMobil Technology & Engineering Kuala Lumpur IT (EMTech KL IT) Data Science Competition aims to empower university students to apply and enhance their data and analytics skills using real-world datasets, fostering innovation and collaboration across Malaysian universities.

Empowerment

Empower students with real-world data skills

Provide hands-on experience enabling students to apply analytics on real-world datasets and solve business-relevant problems.

Innovation

Foster innovation and collaboration

Create a platform for fresh perspectives, creativity, and teamwork to drive innovative solutions in the data analytics domain.

Talent discovery

Discover and showcase local talent

Highlight diverse data and analytics skillsets among Malaysian university students, creating visibility for future opportunities and industry engagement.

2026 timeline and mechanism

Registration (July 1 - Aug 20)
Targeting local undergraduate students across public and private universities in Malaysia. Registration is opened starting from 3pm on July 1 to 3pm on Aug 20.
